## ENTRANCE SYSTEM INSTRUCTIONS

1. Measure door opening. If the brickmould is to remain on the door frame be sure to take this into account. This will give you the "C" dimension. (Example: 36")
2. On the Entrance system Chart under pilasters locate the "C" dimension size to determine which pilasters to use. (Example 36" you would use 7" pilasters to give you an "A" measurement of 50")
3. Move across the chart to choose the Header you want. Choose the pediment which is directly below. (Example: CHT 5009 & AP 5315)
4. On the pilaster page pick out the style you desire.
5. If your door has sidelights pick out the style of Mull Strip you desire. Note these Mull Strips go between the door and the sidelights.
